STUDENT	# Carlos Sanchez
COURSE	Web Development
PROJECT URL	

http://cafesanu-cs253-final-project.appspot.com/

Hello Carlos,

This is a very accomplished resubmission. The front end is clean and easy for end-users. The back end is technically solid, well-structured, easy to read, and amply commented. You have shown a keen eye for detail, making excellent changes that go beyond the suggested improvements. Excellent work!

Code Functionality   Exceeds Specifications

- Submitted URL passes autograder and can be used successfully by the human grader.
- Bonus problem also passes autograder and can be used successfully.
- Front end is intuitive and well thought out.
- Users can sign up, log in, and create pages easily.
- Guest users can view pages and page history.

Code Quality   Exceeds Specifications

- Code follows an intuitive, easy-to-follow logical structure. Modularization is well handled.
- Code that is not intuitively readable is well-documented with block and inline comments.
- Best practices are followed.
- Similar coding constructs (classes, functions, variables, etc.) use similar naming conventions.

The revisions show that as a programmer, you are a lifelong learner who takes feedback seriously. You are both technically competent, and constantly improving your own work. Thank you for implementing all suggestions so gracefully. Your final project is now Totally Udacious!
